FOREWORD

The Education Statistics Bulletin is an annual publication of the Ministry of Education, Science and Technology. It contains information on primary, secondary, teacher training, technical and vocational, and higher education from Malawian institutions for each academic year. The purpose of the bulletin is to provide a basis for evidence based policy formulation and decision-making. It also provides a basis for research, monitoring and evaluation of the education system.

This bulletin is divided into five parts:

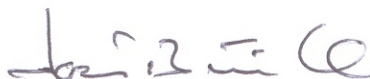

- Section I – Basic Indicators and Comparison of Data
- Section II – Primary Education
- Section III – Secondary Education
- Section IV – Tertiary and Higher Education
- Section V - Education Budget

The Education Statistics Bulletin is an important activity of the Education Management Information System (EMIS) of the Directorate of Education Planning of this Ministry because it provides us with an opportunity to analyze the extent to which the National Education Sector Plan (NESP) (2008-2017) is being realized. Likewise, it provides us with a basis for assessing the alignment of educational goals and their achievements against the Malawi Growth and Development Strategy (MGDS).

The following three main goals from the National Education Sector Plan should be taken into account when going through this bulletin:

- Expansion of equitable access to education, to enable all to benefit
- Improvement of quality and relevance of education, to reduce drop-out and repetition, and to promote effective learning
- Improvement of governance and management of the system, to enable more effective and efficient delivery of services

Finally, I would like to thank the United States Agency for International Development (USAID) and United Nations Children's Fund (UNICEF) for their technical and financial assistance and all those who played a role in the production of this booklet.

John J. Bisika

Secretary for Education Science & Technology

Background

In general, basic education has three main components: early childhood development (ECD), adult literacy including out of school youth literacy and primary education (PE). In Malawi however, basic education is synonymous with Primary Education, ECD is thought of as infant care and support, adult literacy and out of school youth is non-formal education, and PE is part of the formal education system, which in Malawi is a direct responsibility of the Ministry of Education Science and Technology.

The formal education system in Malawi follows an 8–4–4 structure: 8 years of primary, 4 years of secondary and typically 4 years of university level education. At the end of primary, pupils take the Primary School Leaving Certificate Examination (PSLCE), which determines their eligibility for entry into secondary school. Public secondary school students attend either Community Day Secondary Schools (CDSSs) (previously MCDE), or Conventional Secondary Schools (CSSs). At the end of two years of secondary, pupils sit for the national Junior Certificate Examination (JCE), which is followed by the Malawi School Certificate Examination (MSCE) two years later.

Tertiary education is provided by an array of education institutions including primary and secondary teacher training colleges, technical and vocational training schools, medical and health colleges and university colleges. For university entrance and for the secondary teacher training college (Domasi), an MSCE certificate is required.. Technical and vocational training can start either after JCE or MSCE.

Primary education, preschool education and non-formal education initiatives such as adult literacy fall in the category of basic education, with the purpose to equip people with basic knowledge and skills to allow them to function as competent and productive citizens in a free society. Primary and secondary education is administered by the MOEST through its headquarters, the six education divisions and 34 district education offices. University level education is sub-vented by government, and university institutions are autonomous.

Primary, secondary, teacher, tertiary and higher education levels are under the authority of the Ministry of Education Science and Technology. However, early childhood development and non formal education are under the authority of other Ministries including the Women and Child Development and Ministry of Youth Development, which are not shown here in the bulletin.

Important Notes on the data

Data in all tables, unless otherwise stated refer to the 2009/10 academic year. Table numbers are sub-grouped under corresponding sections.

1. Population

1.1 For the purpose of this current issue, the 2010 population projections are based on 1998 population census because at the time of compilation of the bulletin, the official projections based on 2008 population Census were not available

1.2 Average population density: 105/sq. km

1.3 Adult literacy rates: Malawi = 63 (NSO *Education and Literacy, Analytical report vol. 5*)

1.4 Total school-age population by school level (NSO February 2010 midyear projections estimates)

School Level	Age group	Both sex	Male	Percentage	Female	Percentage
Primary	6-13	3,368,420	1,680,078	49.2%	1,688,342	50.8%
Secondary	14-17	1,175,757	586,497	49.8%	589,260	50.1%

2. Area of the country: approximately 118,000 sq. km

3. Some Important Indicator calculation

3.1 **Net Enrolment Rate (NER):** Enrolment of the official age group for a given level of education expressed as a percentage of the corresponding population. This rate shows the extent of coverage in a given level of children and youth belonging to the official age group.

3.2 **Gross Enrolment Rate (GER):** Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year. This rate shows the general level of participation in a given level of education. It indicates the capacity of the education system to enroll students of a particular age group.

3.3 **Survival Rate (SR):** A percentage of a cohort of pupils enrolled in the first grade of a given level or cycle of education in a given cycle of education in a given school year who are expected to reach successive grades. It measures the retention capacity and internal efficiency of an education system. It illustrates the situation regarding retention of pupils from grade to grade and conversely the magnitude of dropout by grade.

3.4 **Promotion Rate:** The proportion of pupils from a cohort enrolled in a given school year who study in the next grade in the following school year. This measures the internal efficiency of the education system in promoting pupils from a cohort from grade to grade.

3.5 Repetition Rate: The proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following year.

3.6 Dropout Rate: The proportion of pupils from a cohort enrolled in a given year who are no longer enrolled in the following school year. This measures the phenomenon of pupils from a cohort leaving school without completion. This is calculated by subtracting the sum of promotion and repetition rate from 100 percent in a given school year.

Note: A high NER denotes a high degree of coverage for the official school age population and the theoretical maximum value is 100%. In case of Malawi there is no universal registration of births, hence age statistics are obtained from verbal responses which makes the age data unreliable.

This is the proportion of a cohort of pupils who reached each successive standard expressed as percentage of pupils enrolled in the first standard of a given cycle in a given school year. This indicator is used to show the extent to which the school system can retain pupils, with or without repetition, and it measures the magnitude of the dropouts.
